AI Systems Manager — Contractor Proposal

FREE_SCAN · · On-site · upwork

65% fit

ROLE

Skills: Python, Shell Scripting, AI/LLM API Integration, REST APIs, Data Pipelines

Scope: Large. Ongoing work over months or more.

Level: Intermediate to Expert

Description:

I'm looking for a part-time AI systems manager to own the ongoing operation, configuration, and improvement of my AI agent orchestration platform. You will work directly with me on a recurring basis to ensure my automated pipelines run reliably, new capabilities are integrated smoothly, and my AI infrastructure continues to scale.

The work involves owning the daily operation of a scheduled AI pipeline system. You'll m

Blockchain Developer needed for Integrating my Crypto wallet with AAVE

60% fit

FREE_SCAN · · On-site · upwork

ROLE

Job Title: Senior Blockchain Developer (DeFi & Aave Ecosystem)
Overview
We are seeking a high-caliber Blockchain Developer to architect and implement next-generation lending solutions built on the Aave Protocol.
You will be responsible for the end-to-end development of secure smart contracts that interact with Aave's Hub-and-Spoke architecture.
The ideal candidate doesn't just "know" Solidity—they understand the deep economic mechanics of liquidity pools, risk premiums, and cross-chain interoperability.Key Responsibilities
Aave V4 Architecture:
Design and deploy modular Spokes that tap into

AI Engineer (LLM Agents, Agentic Workflows)

FREE_SCAN · · On-site · upwork

60% fit

ROLE

We are building an AI-powered workflow platform with agent-based execution. We are looking for an AI engineer who can design, build, and optimize intelligent agents.

This is NOT a basic prompt engineering role. We are looking for someone who understands agent behavior, evaluation, and reliability at scale.

Tech Stack:
* Python
* LLMs (OpenAI / Anthropic / Gemini)
* Vector databases (Pinecone, Weaviate, etc.)
* GCP (preferred)

Responsibilities:
* Design and build LLM-based agents
* Implement tool-calling workflows and agent orchestration
* Improve agent reliability, accuracy, and cost effici

Builders of AI Agents and related applications

55% fit

FREE_SCAN · · On-site · upwork

ROLE

We’re building an autonomous platform for developers creating AI agents and AI-powered applications. We’re speaking with a small group of experienced builders who are actively shipping LLM-based systems in real client environments.

Goal: understand your use cases, opportunities, challenges, workflow, bottlenecks, and where current AI tools break in production.

This is relevant if you:

• Build AI agents or LLM-powered apps for clients
• Work on RAG, tool use, multi-step workflows, or structured outputs
• Have fixed or rebuilt broken AI-generated apps
• Care about architecture, not just promp

AI Automation Engineer / Agent Builder for Trading, Voice, Web Workflows, and Bu…

55% fit

FREE_SCAN · · On-site · upwork

ROLE

I am looking for a highly capable AI automation engineer or agent builder to help create a practical, real-world AI agent system that can support multiple parts of my business and personal workflow.

This is not a simple chatbot project. I want someone who understands how to build AI agents that can take action, connect tools, automate workflows, and support areas such as trading assistance, phone handling, website operations, research, and business process automation.

I have already been working on setting up local and semi-local AI infrastructure, testing tools like OpenClaw, exploring home

Senior Claude Code Expert for AI Agents & Automation

55% fit

FREE_SCAN · · On-site · upwork

ROLE

Sunday, April 5, 2026

Title: Senior Claude Code Expert — AI Agents & Automation — Human Performance Platform
Overview:
We are a UK technology startup building a mobile platform focused on human performance and operational readiness for high-risk industries. We are seeking an exceptional Claude Code expert with deep experience in autonomous agents, multi-agent orchestration, and intelligent automation to join our growing team.
This is not a junior role. We need someone who has built and deployed production-grade agentic systems.
Core requirements:
'!™Advanced Claude Code development
'!™Multi-a

Fractional CTO — AI Agent Orchestration Platform for SMBs

55% fit

FREE_SCAN · · On-site · upwork

ROLE

AEON is an AI Workforce Agency — we recruit, train, deploy, and maintain autonomous AI agents for small and mid-sized businesses. Think staffing agency, but the employees are AI. We're not a platform, not a SaaS tool, not a dev shop. We're a managed service that takes accountability for agent performance, with pricing that includes a base retainer plus a performance share tied to measurable outcomes.

We're currently in active build with a pilot client (a 35-location optics retailer running Odoo ERP) and need a fractional CTO to pressure-test our architecture, accelerate the technical build, a

AI-Powered Lead Intake & Auto-Routing Automation

55% fit

FREE_SCAN · · On-site · upwork

ROLE

We need an AI automation developer to build a multi-step lead intake and routing workflow for our AI automation agency.

When a new lead submits a form (Google Form or webhook), the system should:

1. Classify the lead using AI (service type, urgency level, budget tier)
2. Generate and send a personalized acknowledgment email to the prospect
3. Route the lead to the correct team member based on service specialization
4. Log the submission to Google Sheets or Airtable with AI-generated summary notes
5. Send a Slack or Discord notification with a lead breakdown

You can use n8n, Make (Integromat

Senior Full-Stack Developer — Multi-Tenant Fintech Platform with AI Voice Integr…

55% fit

FREE_SCAN · · On-site · upwork

ROLE

We are seeking an experienced full-stack developer or small development team to build a multi-tenant, multi-provider financial services platform from the ground up — extending an existing backend infrastructure into a new vertical.

The platform serves a hierarchical licensee network: a master distributor manages sub-distributors, each of whom manages their own provider networks. It includes provider portals, admin dashboards, revenue tracking, audit logging, email automation, and AI voice intelligence systems.

IMPORTANT: The full project specification, client identity, platform name, and bus

AI Automation Engineer (n8n + LLM + Email API) to Build Multi-Agent Lead Generat…

55% fit

FREE_SCAN · · On-site · upwork

ROLE

We are looking for an experienced AI automation engineer to build a multi-agent outbound automation system for a cold email lead generation campaign.

The system will be used to generate inbound mortgage leads by reaching out to professionals in Texas who may qualify for down payment assistance programs (teachers, nurses, firefighters, etc.).

The objective is to build a small AI-driven automation system that can assist with lead research, outreach, reply handling, and routing qualified prospects into a CRM where they can schedule a call with a loan specialist.

System Overview

We want to bui

Senior Full-Stack Engineer to Audit, Secure, and Harden AI SaaS Platform

55% fit

FREE_SCAN · · On-site · upwork

ROLE

We are a founding team building an enterprise AI workspace with visual context management. The product is already built, live, and working, and the full codebase has been developed primarily by me, the technical founder, with some support from a manual QA tester.

We moved quickly to build the product and get it into a usable state. That speed was intentional. Now we want to bring in a senior full-stack engineer who can help us validate the current codebase, identify what is strong vs. what is risky, and then continue development with a much stronger focus on quality, security, stability, perf

Crypto Payment Gateway Finish Ship We are looking for a full tack Web3 develope…

50% fit

FREE_SCAN · · On-site · upwork

ROLE

Job Description: Full-Stack Web3 Developer

Crypto Payment Gateway – Finish Ship

We are looking for a full-stack Web3 developer to complete and productionize a cryptocurrency payment gateway. The product enables merchants to accept TEXITcoin (TXC) and PUREmedal (PURE) payments, with a merchant dashboard and a customer checkout flow. The core architecture is in place; we need someone who can close gaps, fix edge cases, align frontend and backend, and prepare for deployment.

About the Project

Product: Payment gateway (branded “Kryptopay”) for TXC and PURE. Merchants get API keys, configu

Reusable SMS Booking Backbone for Clinics. Workflow Assets + Walkthrough

50% fit

FREE_SCAN · · On-site · upwork

ROLE

I'm building an SMS booking and handoff system for multi-service, multi-provider clinics using n8n, SimplyBook.me, Supabase, and GoHighLevel. Primary market: US.

I already have a working deterministic state machine for new bookings integrated with SimplyBook.me's API. I'm now looking for reusable, production-tested assets to strengthen:
- cancellations
- modifications / rescheduling
- operator handoff
- CRM / operator workflow
- bot reactivation after handoff
- customer identity / returning-customer recognition
- multi-language handling
- payments and package management (bonus)

I'm not looki

AI Agent Setup Expert (Claude / OpenClaw)

FREE_SCAN · · On-site · upwork

10% fit

ROLE

I’m looking for an experienced AI automation specialist to help me design and deploy a powerful AI agent using Claude and/or OpenClaw to support and streamline my core business operations.

The goal is to build a reliable AI system that can assist with functions such as operations management, workflow automation, documentation, internal communications, task tracking, customer interactions, and potentially light data analysis. I want someone who understands not just prompt engineering, but full AI agent architecture — including memory, tool use, integrations, APIs, and workflow orchestration.

OpenClaw AI Agent Engineer (LLM Tooling + Workflow Automation)

5% fit

FREE_SCAN · · On-site · upwork

ROLE

Overview

We are looking for a technical OpenClaw specialist to help design and deploy AI agent workflows inside our business.

This role involves configuring OpenClaw agents to perform structured business tasks, connect to external tools, and execute multi-step workflows autonomously.

This is not a basic prompting job. We need someone who understands AI agent architecture.

Scope of Work

You will:

Configure OpenClaw agents for:

Lead research automation

Sales workflow support

Data enrichment

Internal documentation generation

Connect OpenClaw to:

CRM systems (GoHighLevel preferred)

Go
